VENUS VERSA™

Venus Versa™ uses cutting-edge technology to offer non-surgical solutions for many of today's most in-demand aesthetic concerns, including premature signs of ageing, skin damage and uneven texture, cellulite, and wrinkles.

VENUS VERSA™ SKIN TIGHTENING

The Venus Versa™ uses a Multi-Polar Radio Frequency (RF) to provide a comfortable anti-aging treatment that tightens the skin and diminishes wrinkles with no surgery or downtime. The result is a noticeably refreshed and more youthful-looking appearance. As we get older, our bodies naturally produce less collagen, leading to skin that can look dull and noticeably aged. This skin tightening treatment provides an extremely comfortable, non-surgical solution that harnesses the power of radio frequency technology to boost collagen production by heating the deeper layer of tissue under the skin. This treatment works to smoothen out fine lines and wrinkles, tighten sagging skin, and restore a refreshed, younger-looking appearance.

*Recommended course of 8 treatments.
Advanced skin consultation required before booking.

VENUS VERSA™

VENUS VERSA™ SKIN RESURFACING

The Venus Versa™ skin resurfacing treatment comfortably smoothens out uneven skin texture, scars, rosacea, enlarged pores, stretch marks, and other skin textural conditions. Venus Versa™ skin resurfacing treatments work by using tiny pins to safely deliver heat (via Nano Fractional Radio Frequency) through the surface of the skin. This creates very small micro-dermal wounds, which your body naturally heals on its own. The process works to repair signs of skin damage that are visible on the surface, such as scars from acne or injury, deep wrinkles, enlarged pores, uneven skin texture, and pigmentation. Since the wounds are so small, the treatment is much more comfortable than traditional CO2 lasers, while still producing incredibly visible results.

*Recommended course of treatments.
Advanced skin consultation required before booking.

VENUS VERSA™

VENUS VERSA™ PHOTOFACIAL

The Venus Versa™ photo facial treatments work to reduce visible signs of premature aging, such as sun damage, brown spots, visible veins, discoloration, and fine lines and wrinkles. The treatment is powered by Intense Pulsed Light (IPL) with SmartPulse™ technology that delivers precise light through several layers of skin. This generates heat when absorbed by the targeted tissue, which corrects imperfections in the skin without damaging any of the surrounding tissue. A real-time cooling system works to keep your skin protected throughout treatment. Recommended course of 4-5 treatments. Advanced skin consultation required before booking.

VENUS VERSA™ TRIBELLA

Three unique procedures combined to offer complete skin renewal. TriBella from Venus Versa™ combines the power of three unique procedures into one complete skin renewal treatment—resulting in incredibly smoother, younger, healthier-looking skin. This high-intensity non-invasive solution gives highly visible results faster and in fewer treatments. The TriBella photo facial treatment corrects discoloration, fades age spots, reduces sun damage, and improves skin tone. Then, the anti-aging treatment erases fine lines, reduces wrinkles, and firms up skin. Lastly, the skin resurfacing treatment smoothens out uneven skin texture, scars, rosacea, enlarged pores, stretch marks, and other skin textural conditions.

VENUS VERSA™

Venus Versa™ uses cutting-edge technology to offer non-surgical solutions for many of today's most in-demand aesthetic concerns, including premature signs of ageing, skin laxity, skin damage and uneven texture and cellulite.

VENUS VERSA™ BODY SLIMMING

Cellulite is much more common than you'd think. It impacts as many as 90% of women at some point in their lifetime, often due to hormonal changes, genetics, diet, and other lifestyle factors. But as common as it is, it's not something you have to live with. Venus Concept's non-surgical body slimming and cellulite treatments are powered by technology that helps shrink fat cells to improve the appearance of bumps and dimpling. Venus Versa™ body slimming and cellulite reduction treatments work by using energy delivered through a combination of Multi-Polar Radio Frequency and Pulsed Electro Magnetic Fields to produce heat under the skin's surface. This process helps to naturally increase collagen and elastin fibres while also shrinking the volume of fat cells. The result is a more sculpted and slimmer-looking body, tighter-looking skin, and cellulite that almost disappears. These treatments are very comfortable and can be customized to target fat and/or cellulite at any stage with no downtime.

*Recommended course of 8-10 treatments.
Body treatment consultation required before booking.
